

Work Plan

2007-2010

Draft

**Commission 7. Cadastre, land management
(land administration)**

Commission 7 established its concept, harmonised with the FIG long term strategy, 15 years ago, selecting key topics

- advanced cadastre
- developing land administration
- creating secure land tenure
- tools for land management
- application of innovative, advance technology
in land administration

New challenges

- sustainable development
- post conflict problems
(civil wars, tribal conflicts, disasters, etc.)
- rapid urbanisation in the developing world
- increasing gap between developed and developing world

All are connected to land and property related activities

To achieve Commission 7 concept, goals, long period is required

Commission 7 wants to continue its professional work which was successful during the passed years

Some new priorities based on the last four years experience

Following FIG strategy

- Commission 7 continue its effort focusing on countries in Africa, Latin America, Asia, Middle-East, CEE and providing meeting place as well
- Strengthening working co-operation with other FIG commissions
- Continue co-operation with UN organisations, agencies, World Bank, ISPRS, etc.
- Finding possibilities to co-operate with other professional organisations, NGOs, Dutch Cadastre, ITC, FÖMI
- Providing and disseminating information to profession and countries to develop and modernising land administration systems.

-
- Contribute to organise joint workshops, events with UN and other external organisations
 - Contribute to formulate the professional program for FIG congresses, working weeks
 - Supporting regional events
 - Encourage national delegates, representatives to participate in FIG events
 - Contribution, participation in major FIG events
