Citizens Rights to the Real Property
Conference
30th November – 1st of December 2009

Cadastre Agency
of Moldova

Întreprinderea de stat
CADASTRU

Background of the Event

- 2006-2009 – SIDA supported project (Swedish.Dev.Agn.)
- Technical Assistance to Support Moldova First Cadastral Project
  - Capacity Building: Cadastre as a Business
  - Valuation and Taxation Issues
  - Support IT system for Cadastre

- Conclusions => continue with Business Development + partners involvment + citizens' awareness
- **GOAL of the Conference:**
  - ⇒ **„bridging" between current and future actions**
  - ⇒ **Prepare for the Future. What is next?**

Theme 1 – Rights and Maps

- What Real Property Rights means in reality in the Eastern European and Central Asian countries?
- Do citizens have knowledge why Cadastre is important for them? Cadastre and the security of the Rights.
- Could Cadastre help for the poor, for the minorities for the women to be aware?
- What comes first: the hen or the egg - the rights or the map?
- What could make a difference – more legal regulation or better accuracy?
- How much is it important for the owner being more punctual – value for the money?
- Who pays for the centimetres? Does it worth?

Theme 2 – Suistanibility

- The angles of the sustainability. Cadastre as a business? How could we do it? Could it be done in this region?
- The Donors' involvement, and the transfer of the best practices.
- What could work and what not – what are the current experiences?
- Wishes and financing possibilities.
- Being costumer oriented - could it be thought? What could be the role of the private companies?
- The Role of the marketing, the communication and the risk management.
- Taxation, Valuation – could citizens be convinced about the positive sides?
- The Quality Control (in the services and in the products) – as a road for the trust of citizens.

Theme 3 - Technology

- Let's look at the technology! Our life could be much easier, than 10 or 5 years ago!
- What open source software could do for us?
- e-Cadastre is an important part of the e-Governance: use the knowledge, the tools!
- The Internet, the Intranet and the GIS – do not struggle with old technologies.
- Value for the money – is it any „best solution"?
- Transferring old data. The challenges of not loosing data and being up to date.

Participation Possibilities

- 2 days participation
