

RCMRD Connects Space to the Village

Kenneth Kasera (Kenya)

Key words: Keyword 1; Keyword 2; Keyword 3

SUMMARY

Regional Centre For Mapping Of Resources For Development (RCMRD) is an intergovernmental organization serving 20 Contracting Member States across Eastern and Southern Africa. The Centre supports its member countries by delivering geospatial information, capacity building, and related technologies that drive informed decision-making and sustainable development. The thematic areas of action include Land Administration and Management, Agriculture and Food Security, Ecosystem Management and Natural Resource Monitoring, and Disaster Risk Reduction. RCMRD provides insights from Earth Observation and geospatial science (both upstream, mid and downstream), supports policy formulation and implementation (space-based strategies) to Earth intelligence, enables timely action, and ultimately delivers impact for sustainable development, climate resilience, disaster risk reduction, and economic growth at local, regional, and global levels. RCMRD connects space to the village.
