

Empowering Sustainable Development with Geo-Intelligence: SuperMap GIS Applications in Natural Resource Management

Guo Bo (China, PR)

Key words: Keyword 1; Keyword 2; Keyword 3

SUMMARY

How does geospatial intelligence accelerate sustainable resource management aligned with the Sustainable Development Goals (SDGs)? This talk showcases SuperMap's integrated GIS platform—combining AI, 3D, and remote sensing—through real-world cases: climate action platforms, AI land-use change detection, flood early warning, and national 3D spatiotemporal databases. See how geospatial intelligence turns data into better decisions, faster.
